

Cake N Crush Bakery Portfolio Implementation Plan

Overview

Building a visually stunning bakery portfolio website for "Cake N Crush" featuring chef Tamanna Arzoo, with unprecedented animations, admin panel for portfolio management, WhatsApp ordering integration, social media links, and animated geolocation features.

Current State Analysis

Empty repository with clean git setup and comprehensive .gitignore. Complete build from scratch required with no existing framework constraints.

Desired End State

A responsive, animated bakery portfolio website that:

- Showcases cake designs with advanced animations
- Provides admin-only image upload management
- Integrates WhatsApp ordering and social media
- Features animated geolocation for shop finding
- Delivers unique visual and text animations never seen before

Tech Stack Architecture

Framework: React 18 + Vite

Animation: Framer Motion + GSAP for complex sequences

Styling: Tailwind CSS + CSS-in-JS for dynamic effects

Admin: React Router + JWT authentication

Image Storage: Local storage with optimization

Deployment: Netlify/Vercel ready

Why this stack:

- React + Framer Motion provides best animation capabilities
- Vite offers fastest development and build times
- Tailwind enables rapid styling with animation utilities
- Local storage keeps implementation simple for admin uploads
- JWT provides secure admin access without database complexity

Admin Panel System

Overview

Full admin dashboard for managing cake portfolio with authentication, image uploads, and portfolio management.

Authentication System

- **Route:** /admin
- **Authentication:** JWT token-based login
- **Storage:** LocalStorage for token persistence
- **Default credentials:** admin/cakencrush2024 (changeable in .env)

Admin Panel Features

- **Dashboard at /admin/dashboard:**
- Portfolio statistics (total cakes, views, orders)
- Recent activity feed
- Quick upload buttons
- Portfolio management grid

Image Upload System:

- Multiple file upload with drag-and-drop
- Image preview before upload
- Automatic image optimization (WebP conversion)
- File size validation (max 10MB per image)
- Support for JPG, PNG, WebP formats

Portfolio Management:

- Add/edit/delete cake entries
- Categorization (Birthday, Wedding, Custom, Seasonal)
- Price range specification
- Detailed descriptions
- Multiple images per cake
- Reordering with drag-and-drop

Security:

- Protected routes with JWT middleware
- Admin-only access tokens
- Auto-logout after 30 minutes
- Secure image upload validation

File Structure

...

src/

```
└── components/
    |   └── admin/
    |   |   └── AdminDashboard.jsx
    |   |   └── ImageUpload.jsx
    |   |   └── PortfolioGrid.jsx
    |   |   └── LoginForm.jsx
    |   └── common/
└── hooks/
    |   └── useAuth.js
    |   └── usePortfolio.js

---
```

WhatsApp Ordering System

Overview

Direct WhatsApp integration allowing customers to order cakes by clicking on portfolio items, with pre-populated order details for seamless communication.

WhatsApp Integration Details

- WhatsApp Number:** +91XXXXXXXXXX (configurable in .env)
- API Method:** WhatsApp Click to Chat (wa.me links)
- No API key required** - uses WhatsApp web interface

Order Flow Process

Cake Portfolio Item → Order Button → WhatsApp Chat

- Customer Action:** Click "Order via WhatsApp" on any cake
- System Response:** Opens WhatsApp with pre-filled message
- Pre-filled Message Format:**

...

🍰 Cake N Crush Order Inquiry!

Cake: [Cake Name from Portfolio]

Price Range: [Price Range from Portfolio]

Category: [Cake Category]

I'm interested in ordering this cake. Could you please provide:

-  Available delivery dates
-  Customization options
-  Final pricing details
-  Delivery location options

Looking forward to hearing from you!

...

Implementation Details

WhatsApp Button Component:

- Floating action button on each cake portfolio item
- WhatsApp green color (#25D366) with white icon
- Hover animation using Framer Motion
- Mobile-optimized positioning

Order Button Placement:

- Desktop: Bottom right corner of each cake card
- Mobile: Fixed position at bottom of screen when viewing cake details
- Always visible, never obscured by other elements

Message Customization:

- Dynamic cake name insertion
- Price range included from portfolio data
- Category tag for better organization
- Professional greeting with Cake N Crush branding

Mobile Experience:

- Direct WhatsApp app launch on mobile devices
- Fallback to WhatsApp Web on desktop
- Smooth transition without page reload

File Structure Addition

...

```
src/  
├── components/  
│   ├── ordering/  
│   │   └── WhatsAppButton.jsx
```

```
| | └─ OrderModal.jsx
└─ hooks/
| └─ useWhatsAppOrder.js
└─ utils/
    └─ whatsappUtils.js
...

```

WhatsApp Integration Benefits

- **No additional costs** - uses free WhatsApp web interface
- **Immediate response** - direct chat with bakery
- **Mobile-first** - works seamlessly on phones
- **Professional appearance** - branded order messages
- **Easy tracking** - all orders in WhatsApp chat history

Social Media Integration

Overview

Integrated social media presence across Instagram, LinkedIn, Telegram, and Twitter with animated icons and engaging user interactions.

Social Platforms & Links

- Instagram:** @CakeNCrushOfficial
- LinkedIn:** Cake N Crush - Tamanna Arzoo
- Telegram:** @CakeNCrushUpdates
- Twitter:** @CakeNCrush
